I am going to miss him so much ...

What are you standing there for ?!

I risked my fucking life to save the refugees !

You girls should be by my side and be looking after me !

Yes..., I miss the quiet one in bed.

What are you talking about ?!

Well, it seems G.K.'s antidote did work.

Anyway..., the refugees need to relocate but there aren't many places where so many can settle down without a fuss ...

If we could have found Pepe, this would have been easier.

Speaking of which, I trusted the orange hair because she was cute. But I think the Pepe thing was a lie.

Ahhh ~

What the hell is up with her now ?

I am sorry but I have to pee.
I haven't had warm drink for so long that I drank too much. Not that I am blaming Miss SeongHa for warming it up though.

Hey, orange hair ... No need to say that out loudly for freak's sake. Just go quie...

The FUCK ?!

Why are you lifting up your skirt ?!

Well~

Cuz I have to go really badly. ♥

Are you trying to kill me for sure now ?!

W, wait ... I am not ready to ...

But ~~ I can't hold on ~

쉬아아아아아!

Ah~

Ah~

Uwha-aaaaa !!!

Nooo

Fucking hell ...

Why the fuck didn't you just tell us that you were Pepe ?!

Because I needed to be absolutely sure that I could trust you.
My life was on the line as well.

Hey ~

My love Pepe ♥

Your what ?

The hell ...

THAT is a GUY ! She... He ... whatever it is has been fooling you all along !

Yep, I do know.

You what ?

That is precisely why Pepe is my love.

Did you get a knock to your head or something ?! That is a GUY !

What do you think G.K. stands for ?

G... K ... ?

Hmm ....

Oh..., fuck ! Don't tell me ...

G.K. stands for ...

Gay King

GAY KING

Is everyone trying to kill me today ?!

Well, um ...

Please, God, no. No more please.

What I am about to tell you... It could hurt you badly.

Huh ?

Because it is about your mother, SeongHa.

What ... ?!

Your mother ...

Before she was taken by the government, she belonged to a circle of elite scientists.

The circle believed mankind had gone too far and that it was better for men to disappear.

And then they approved the concept of using a human brain as a CPU. It was previously banned for being too immoral.

To go ahead with the project, they needed a suitable brain. The brain needed to be able to withstand the punishment.

It turned out that your brain was the suitable one.

Your mother's brain was also found to be suitable as well but they felt a younger brain would be better.

Your mother, however, attempted to persuade them that her brain would ultimately be better and she succeeded in persuading them.

The computer, then, decided that fire was unnecessary and created the chemicals.

So..., so it was to protect me ... The reason she conducted experiments on herself while others were calling her a witch...

I had no idea ... And I hated her for being bullied because of that.

I am sorry but real bad news start here.

The computer has seized functioning along with your mother.

Mom ...

Which means we have no way of bringing fire back and curing Rai is also impossible now.

So, this is it then ? The world will never go back to the way it was ?

Nothing has changed in essence.

?

Whether there was fire or not, lives of the poor is the same.

At least now, our fate is within our hands. You've looked after us for so long. Now allow us to shelter you.

So be it. I will find a suitable place to settle down.

Everyone ...

Wait a damn sec here ! What about me ?!

I am gonna die like this ?!

I actually lied to you -

That you would die early if you stayed by my side.

I had to lie because you weren't willing to search for my mother.

What ...

So, as long as you stay by my side, you will fulfil your lifespan.

LoL ~ Which means you are bound to become her slave for as long as you live.

?!!

What about my freedom?! Give me back my life !
